Dr. Morcease Beasley
Ms. Luvenia Jackson
Mr. Robert Dolphin

Board Members Absent:

Mayor Angelyne Butler
Dr. Timothy Brown

Board of Health Staff:

Dr. Unini Odama, Interim DHD
Tara Taylor, District Administrator
Rodi Evans, Administrative Assistant

Approval of the Minutes
Chairman Turner requested approval of the December 13, 2018 Board minutes. Motion was made by Dr. Morcease Beasley and seconded by Ms. Luvenia Jackson. Motion passed unanimously.

Director’s Report

Dr. Odama provided an update to the Board which included:

Dr. Odama began with updates on the progress of CCBOH since August 2018. At the time there was operational ineffectiveness, an inability to provide timely services to clients, lack of essential equipment to perform daily tasks and clients had to be sent to surrounding districts for services. Since that time major improvements have been to improve. Operationally fleet has been purchased, Fleet purchased includes a 2018 Chevrolet Cruz, and a 2019 Chevrolet Silverado 2500 HD, that will be used to pull Emergency Preparedness equipment. Insurance for vehicles was obtained through the CCBOH.

In terms of facilities at Battle creek, the engineer was called out and they advised us to have a solid roof with 30-year edge leak free. Bids were estimated on the 18th of February and should be awarded by the end of the month. In terms of Phoenix Blvd the WIC project was discussed with the

www.claytoncountypublichealth.org

PREVENT PROMOTE PROTECT
state, but once there was news of renovating Battlecreek, the decision that the space would be too costly and would only benefit the owner of the building. An alternate space on the same floor, which we are already paying for, has been found that would be a suitable alternative for the WIC relocation. The state came to look at the Space and gave no objections, there would be a cost of $13,000- $15,000 to place cubicles and a new sink in the space. We are waiting on written confirmation before the move is made and improvements are made. In terms of Forest Park, fully functional clinic activities. Upper Riverdale location (Ryan White) clinic is fully operational and seeing patients. Our Fulton County counterparts are still allowing us to use their space for Dental Services, which are going well. Dental is continuing to increase its number of patients.

Clinical Services demographic wise we have about 285,000 people being served. Currently there are 6 Licensed Practical Nurses, 6 Registered Nurses, 2 Nurse Practitioners, 1 OB/GYN, 1 Dentist, 2 Medical assistants, and Admin. Support at Clinical Staff at the Forest Park location. Target areas include Forest Park, College Park, Riverdale, Jonesboro, Morrow, Lovejoy and Rex. Seventh grade immunization records show that since the displacement numbers had gone down. The same thing goes for Family Planning, STD, TB, Immunizations, Child Health, BCCP, these are numbers to provide trend, for our individual numbers everything is on the upward. Most of our notifiable cases are Chlamydia, we have one of the highest rates of Chlamydia in the state, along with Gonorrhea and Syphilis. We are doing STD screening and visiting the schools and colleges to make sure that we offer free testing and information. As far as TB case, there were only 2 TB cases in the whole County. 9 suspects, 5 that are being treated for latent TB, and 4 that are being treated for full blown TB. Ryan White cases, they were not able to see many patients because of the displacement. They were down to 94 patients in November, by January they are up to 123 patients. The only notifiable diseases were Chlamydia, gonorrhea and Hep. C, all other numbers are minima, also we are doing well in terms of hepatitis A, E. Coli, or any food borne diseases.

Environmental Health was behind in food inspections, and urgently needed assistance to be able to finish the inspections in a timely manner. We reached out to District 4 to contract with them. District 4 sent a few of their EH Staff to help us catch up to be in sync with the new year. Currently 258 routine inspections have been done. Most of them were in the “A” category, some were “B”, the “C” and “U” places must be revisited for follow ups. In terms of Tourist Accommodations, we’ve inspected 13, and done 9 septic inspections.

Budget Update

Dr. Odama provided overview of CCBOH Budget from written report handout.

- Lovejoy
- Rex
Community Involvement

- School Based Flu Clinics set up in 5 Clayton County Public Schools in October 2018.
- Child Health nurses attended the Major Help Career Fair at Riverdale Town Center on March 21, 2018. Nurses provided students with information about career in the nursing field. Information about immunization and vaccine preventable diseases was provided as well.
- The Clayton County Public Schools in Collaboration with Clayton County Board of Health and The Family Health Centers of Georgia, Inc. provided and opportunity for 6th grade students to receive their 7th grade vaccinations (Tdap, Meningitis) prior to the end of the school year. The clinics were held April 10th - April 13th and various Middle Schools throughout the county.
- Participated with the CCPS Transition to kindergarten fair by presenting information around immunizations and school screenings. Nurses also assisted with hearing, vision, dental, and screening at the fair.
- During the summer, Clayton County Public Schools School Health Program and Clayton County Board of Health collaborated to provide Immunizations and School Screenings on-site at 4 Middle School Locations: Forest Park Middle, Adamson Middle, Lovejoy Middle and Jonesboro Middle.
- CCBOH staff participated in the CCPS Back to School Fair to provide school screenings and Immunizations. This is an annual event where community members and organizations pull resources together to provide free school supplies, haircuts, clothing, screenings, resources and free food and entertainment.
- Our Dental Program collaborates with the Clayton County Community Services Authority to provide the Clayton County Head Start Program participants with preventative dental care to include screenings, x-rays, prophylaxis and follow-up treatment. This collaboration has existed for 6 years.
- WIC worked with Amerigroup community care representative to host Breastfeeding workshop. Those workshops are at Southern Regional Medical Center in partnership with their Women center.
- WIC has worked with Southside Medical Center to provide Breastfeeding education to their clients.

+ Working with the CCPS Nurses to provide outreach and education and to also offer additional clinics for students needing the 7th grade vaccinations.
Clinical Services Summary Data

CCBOH 2017 VS 2018 CLINICAL VISITS

- All clinical service visits in 2018 were less than 2017 due to the temporary shutdown and relocation.
- Several programs were halted because of shutdown/relocation.
- STD (Sexually Transmitted Diseases) and TB (Tuberculosis) services resumed February 2018.
- Family Planning and BCCP (Breast and Cervical Cancer) services resumed March 2018.
- Child Health/Immunization services fully resumed at the Forest Park location September 2018. Child Health and Immunization service numbers were significantly affected during back to school time (July-September).

Upcoming for 2019:

- Opportunity for a Client Navigator to assist with outreach and education to women ages 21-64 to get screened for breast and cervical cancer (BCCP).
- WIC partnership with Southern Regional Women’s Center and Clayton County Public Schools.
- Partnership with the Early Learning Task Force of CCPS to help establish a Literacy Station in our WIC waiting area.

Ryan White experienced a slight drop in patient encounters when it moved to its new location in November but the numbers are gradually increasing.

TB

Current TB Patient Breakdown

- Suspects are those immigrants new to the country that are received from the state office to screen for TB.
- 3 Rifapentine and Isoniazid (3-HP) are patients with latent TB who are receiving 12 once a week doses of medication by directly observed therapy.
- 9-month (Isoniazid) INH are patients with latent TB who are receiving 9 months self-administered dose of INH.
