Early Hearing Detection and Intervention

The Georgia Early Hearing Detection and Intervention Program (EHDI) is a collaborative effort of the Division of Public Health, audiologists, physicians, hospitals, and parents. If you ever have concerns about your child’s hearing, speech, or language, be sure to discuss them with your child’s doctor.

Newborn hearing and screenings are conducted by appointments only. No referrals needed. We also provide ABR and OAE Testing for infants under 3 months old.

For more information about Early Hearing Detection and Intervention (EHDI), please call (678) 610-7362.

Martin Luther King Jr Day
Monday, January 20, 2020

I have a dream that my four little children will one day live in a nation where they will not be judged by the color of their skin, but by the content of their character.

- Martin Luther King

Community Resource Highlight

Clayton Center
136 Southlake Plaza Drive, Morrow, GA 30260
Phone: 770-473-2640

Mission: Provides services that minimize the impact of mental illness, developmental disabilities and substance abuse in the lives of persons served and their families, while supporting the inclusion in the community.

Purpose: Outpatient services are provided to children and adolescents with emotional and behavioral health problems, and their families, to achieve behavioral modification and to help them maintain.

Ages Served: Outpatient programs serve children and adolescents from age 4 to age 21 as long as they are still enrolled in school.

ANNOUNCEMENTS

February is American Heart Month

Heart disease is the leading cause of death for men and women in the United States. Every year, 1 in 4 deaths are caused by heart disease. The good news? Heart disease can often be prevented when people make healthy choices and manage their health conditions. Here are just a few ideas:

*Encourage families to make small changes, like using spices to season their food instead of salt.

*Motivate teachers and administrators to make physical activity a part of the school day. This can help students start good habits early.

*Ask doctors/nurses to be leaders in their communities by speaking out about ways to prevent heart disease.
