

On Site Sewage Management System New Construction Application

No person may begin the physical development of a lot, or the installation or alteration of an on-site sewage management system (OSSMS), without having first applied for and received a written On-Site Sewage Management Permit by the Clayton County Board of Health. The Clayton County Board of Health shall approve or disapprove such septic application within twenty days after the receipt of a completed application.

(Please fill in the appropriate response)

Lot suitability and approval will be determined by all the information submitted in accordance to the criteria established by the DPH current manual for on-site sewage management systems.

Further information may be requested by our office (such as a level three or level four soil report, test pits, percolation tests, scaled sited plants, etc.) to help determine if an on-site sewage permit will be issued on the proposed lot.

Soil Scientist: _____ Level of Soil Study: _____

**Soil survey report must be conducted by a certified classifier/soil scientist by the state of Georgia.*

Make a proportional sketch of the lot, house, drive-way, utilities, septic tank, initial drain field area, designated replacement drain field area, etc. If applicable, please include the location of any pump tanks, ATU's trash pits, landscaping features, gravel beds, fill dirt areas, distribution boxes, swales, proposed or existing wells 100 feet of the property line, creeks, or other bodies of water within 50 feet of the property line, etc

Additional Comments: _____

Issuance of an On-Site Sewage Management System Permit by the Clayton County Board of Health shall not be construed as a guarantee that such systems will function satisfactory for any given period of time, furthermore, said county representatives do not by any action taken in affecting compliance with these rules, assume any liability for damages which are caused, or may be caused, by the malfunction of such system.

This document shall not be used as a binding contract between an on-site sewage management system contractor and a property owner/authorized agent.
